

TECHNICAL DATA SHEET

Product Name: Cutlery Presoak Low Foam

Item Number: H198LF

Description: LIQUID CUTLERY PRESOAK has been compounded for removing dried-on food particles in a pre-soak bath. This detergent reduces spotting and streaking by keeping magnesium and calcium in suspension. LIQUID CUTLERY PRESOAK dissolves grease and dried on food particles more readily than other types of compounds. It penetrates through grease, emulsifying and lifting it from the surface with an abundance of speed, yet without hurting even sensitive hands. It may be used in hard or soft, hot or cold water.

Directions: For heavy duty cleaning; use 1-2 ounces of LIQUID CUTLERY PRESOAK for each gallon of water. Let hard to clean articles soak for a few minutes, then wash and rinse. For ordinary jobs, reduce the amount of detergent used. Wash and rinse in the usual manner. Being biodegradable, the detergent emptied into sewers and drains can be attacked by bacteria and broken down into harmless compounds which do not contaminate or affect water or soil.

Container Disposal: Rinse empty container before discarding

Spill Or Leakage Procedures: In accordance with local regulations

Product Specifications:

Colour: Clear Red

Odor: No Fragrance
