

TECHNICAL DATA SHEET

Product Name: Canadian Shield Liquid Ice Melter

Item Number: H 373

Recommended Use On:

Sidewalks	Driveways	Stairs
Concrete	Loading Docks	Terrazzo
Plastic	Rubber	Bridges

Effective Against Ice, Frost and Snow on asphalt and concrete surfaces.

Features and Benefits

- Prevents build-up of ice and snow.
- Effective in temperatures as low as -47°C.
- Ideal alternative to harmful deicing pellets
- Contains NO Calcium or Sodium Chloride.
- Colouring agent ensures accurate treatment (non-staining and biodegradable).

Description: Canadian Shield Liquid Ice Melter is a cost effective liquid de-icer. To allow for accurate measurement of Liquid Ice Melt, a non-staining, biodegradable colouring agent provides a visible marker for areas already treated. Contains a fast acting formula to penetrate hard packed ice and snow and prevents the bonding of snow and ice. Canadian Shield Liquid Ice Melter allows pre-wetted material to become effective immediately when mixed with sand or salt. Reduces corrosion of metals and concrete and has minimal effect on the surrounding environment. Does NOT contain calcium or sodium chloride.

Directions:

Anti-Icing, De-Icing and Pre-Wetting: See product label for complete directions. For long lasting effects put Liquid Ice Melter into a 1 gallon (4L) sprayer or dispenser and apply directly to the treatment area. Will be effective on two inches of fresh fallen snow. Residue will create a non-stick surface preventing ice and snow from bonding.

IMPORTANT: When a large amount of snow is present remove it first with a shovel or snow blower before applying liquid.

CAUTION: KEEP OUT OF REACH OF CHILDREN.

Spill Or Leakage Procedures:
