

# TECHNICAL DATA SHEET

---

**Product Name:** Shampoo

**Item Number:** H821

**Description:** This product is an extraordinary type of carpet/rug and upholstery cleaning compound. It is intended for the cleaning of carpets, rugs, furniture upholstery, automobile carpeting and upholstery, staircase runners, and as a spotter for carpets and rugs. Shampoo is a high concentrate shampoo that dries to a fine white powder. Powder action help absorb stains. Safe to use on all fabrics not harmed by water. Revives colours and enlivens fibres, bringing up the pile. Use of this product will dissolve and remove dirt, grease, oil, smoke and its odor, coffee, cola, and other beverage spills, food residue, pet stains, cosmetics, grass stains, and similar soils. After cleaning with the product or using one of the methods shown below, the product will dry to a fine, white powder to be vacuumed away. The results from either method of application will be a cleaned carpet or upholstery surface, that is free of sticky, soil attracting residue.

**Directions:** 1. Shampoo Method: Dilute product at a rate of 1:15 with water and apply to surface with a rotary type shampoo machine. Work solution into fiber and allow to dry. This normally takes 2 to 3 hours depending on pile depth. When completely dry, vacuum away white powder and soils. To raise fabric pile, brush with a stiff, clean broom. Repeat vacuuming for further cleaning. 2. Spray Method: Dilute product 1:15 with water. Using an appropriate sprayer, such as a pump-up type, spray solution onto carpet or upholstery. Allow to thoroughly dry, then vacuum as above. 3. Spotter Method: Dilute product 1:15 with water. Apply product with a trigger sprayer to area. Agitate with a brush. Allow to dry, then vacuum as above. Note: For optimum results, follow all label instructions and test a small area of carpet or upholstery prior to application as all fibers are not color-fast.

**CAUTION:** Do not ingest. If this should occur, drink large volumes of water and seek medical attention. Store in an area which will prevent freezing. Keep container sealed when not in use to prevent contamination. KEEP OUT OF REACH OF CHILDREN.

**Container Disposal:** Triple rinse container and discard according to local regulations.

**Spill Or Leakage Procedures:** Dike, contain and reuse. Small spills can be flushed down the sewer after water dilution.

**Product Specifications:**

Color: Clear

Odor: Faint Alcohol

Appearance: Clear

pH: 8.5 - 9.5

Flash Point: None
