

TECHNICAL DATA SHEET

Product Name: Hi Efficiency Laundry

Item Number: NL 537

Description: High efficiency washing machines accommodate larger loads and save money on utility bills, but you need the right laundry detergent to get the results you expect. HE is specially formulated to unlock the cleaning potential of high efficiency washers. Standard detergents can cause over-sudsing when less water is used, and using less detergent sacrifices cleaning power. HE provides excellent cleaning with the right level of sudsing.

Directions: Use 1 to 2 oz per 50lb load of laundry. You may want to use more for large loads, heavy soiled clothes, or very hard water. Sort your wash by colour, fabric and amounts of soil. Follow instructions on manufacturer's care label. Heavy soils, stains, grease: soak colour fast or white washable items in a solution of 2 gallons hot water and 3/4 cups of detergent.

Container Disposal: Rinse empty container before discarding

Spill Or Leakage Procedures: In accordance with local regulations

Product Specifications:

Colour: Clear blue

Odor: Fresh Scent
